

URBAN FARMING, FOOD JUSTICE & TECHNOLOGY

A COMMUNITY-CENTERED RESEARCH PROJECT

Supported by The National Science Foundation

We are a group of researchers from the University of Washington's College of Engineering and community organizers studying the role of urban gardening and its associated technologies in community efforts and movements toward food sovereignty. Our project is in close partnership with Skyway-based food justice organization The Silent Task Force. Our goals are to understand 1) How can urban gardening feed, educate, and uplift communities that are otherwise underfunded and segregated from a major city? 2) What is the role of technology in enabling food justice & food sovereignty in historically marginalized communities?

Who is eligible?

- Urban gardener and farmers
- Members of communities facing food injustice
- Community organizations fighting food, climate, and/or land injustices
- Site (of gardening or community organizing): the state of Washington
- Age: 18 years and above

How can you participate?

- Participate in an interview for one of our ongoing studies
- Join a future workshop as a participant
- Sign up by filling out our form by clicking on this link: <https://tinyurl.com/UW-Recruitment-Form>

Benefits

- \$50 gift card upon completing interviews
- \$200 gift card for workshop participation
